## Argon Corporation Introduces our Production Ready ARD27, 27" Rugged Display Monitor

**Alpharetta, Georgia** – Argon Corporation, designing and manufacturing Commercial Off the Shelf (COTS) rugged display monitors and computers, is pleased to announce that our ARD27 rugged display has successfully passed airborne qualification testing parameters, including both environmental, EMI, and safety and abuse testing, regarding airborne C4ISR applications.

The ARD27 is a low profile (25" w x 15" h x 2.6" d), high resolution unit at 2560x1440 (WQHD). It boasts just about any video input required on the market today, including DisplayPort, DVI, HDMI or traditional VGA. The standard unit conforms with Mil Std 704A, with 50msec holdup. Customers can select from a variety of standard options or consult with Argon to have the unit tailored to your unique application or installation.

Ideal for retrofits or new installations, the ARD27 is already in production. Contact Argon for more details and for how the ARD27 may be a winning solution for your application.

### ***About Argon Corporation***

*Argon Corp, a privately held company, headquartered in Great Neck, New York, and with production facilities in Alpharetta, Georgia, has over 25 years of experience in designing, producing and supporting a variety of COTS rugged displays, computing solutions, and peripherals, which have been deployed in land based, naval and airborne applications worldwide. Argon Corp has developed a strong reputation for working with customers to design solutions to meet their exact requirements for their intended application.*
