Argon Corporation Introduces our Production Ready ARD43, 43" Rugged Display Monitor

Alpharetta, Georgia – Argon Corporation, designing and manufacturing Commercial Off the Shelf (COTS) rugged display monitors and computers, is pleased to announce that our ARD43 rugged display has successfully completed new product development and is ready for production orders. The

ARD43 is currently undergoing qualification testing, including environmental and EMI tests, notably including Mil-S- 901D. The unit boasts a UHD resolution at 3840x2160 pixels, is lightweight (for a rugged 43"!) at just under 50 lbs, has a very low depth and the signature Argon streamlined bezel.

The ARD43 has a very small footprint at 39.3"w x 23"h x 4.2"d. It can be configured to accept just about any video input required on the market today, including DisplayPort, DVI, HDMI, or traditional VGA. Customers can select from a variety of standard options or consult with Argon to have the unit tailored to your unique application or installation.

Ideal for retrofits, or new installations, the ARD43 is production ready. Contact Argon for more details and for how the ARD43 may be a winning solution for your application.

About Argon Corporation

Argon Corp, a privately held company, headquartered in Great Neck, New York, and with production facilities in Alpharetta, Georgia, has over 26 years of experience in designing, producing and supporting a variety of COTS rugged displays, computing solutions, and peripherals, which have been deployed in land based, naval and airborne applications worldwide. Argon Corp has developed a strong reputation for working with customers to design solutions to meet their exact requirements for their intended application.
